A HOT SUMMER SUN CAN CAUSE PROBLEMS FOR MANY VENUES

## SUN BLOCKERS

**Sun Blockers** — Hot summer sun can cause problems for many venues, our custom Sun Blockers provide the solution. If your venue's visitors and performers suffer due to the glare of the evening sun, we can work with you to create a solution that is both beautiful and effective. With our digital fabric printing technology we can create a custom fabric shade for your venue that will help cool your visitors and enliven your performers. These tall shades can also work for you as projection screens or as large-scale advertisements for your venue or event, allowing passers by easy access to your location and information. These shades are easy to setup and take down and allow you to lengthen your performance times and expand your programming potential. With any situation, Installation Arts can work with you to create the perfect look for your venue.

# SUN BLOCKERS

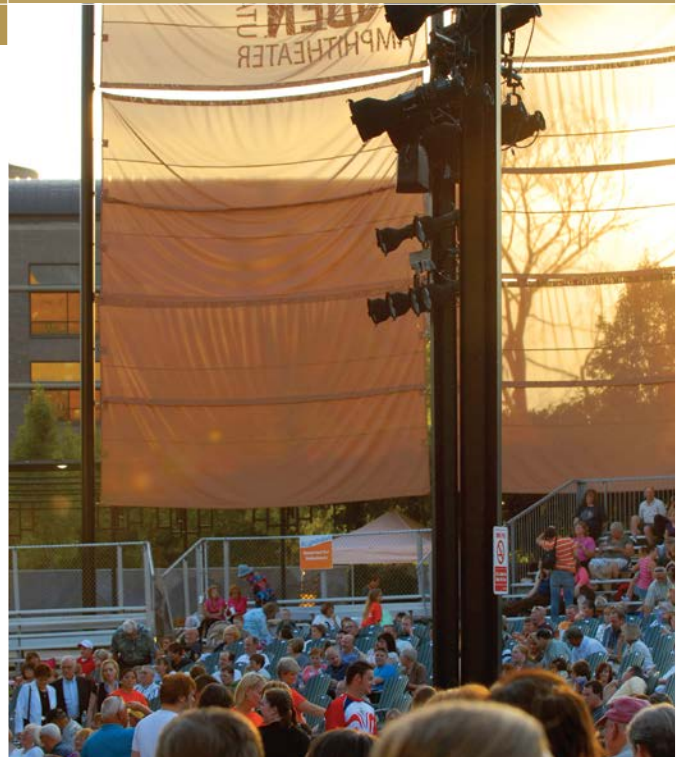

**Audience Comfort** — Give your audience and performers the relief of shade from the hot summer sun.

**Advertisement** — Display your next event, advertise your program or honor your sponsors in a highly visible way.

**Projection Screen** — Utilize your shades to project videos and images to enhance your programming.

**Venue Location** — Allow your audience to easily locate your venue with a highly visible landmark.

- ▶ By using our most hardy, weather resistant material and the best hardware, we can make sure your Sun Blocker remains a beautiful and functional tool for you throughout your performance season and for many years to come.
